SUMMARY

Recent Information Technology graduate from Telkom University with a strong foundation in backend systems, database design, and data pipeline development. Experienced in Golang, Python, and SQL for building scalable RESTful APIs and managing structured data workflows. IEEE-published researcher with hands-on experience in end-to-end data processing – from raw ingestion to predictive modeling. Actively expanding expertise in modern data engineering tools including Apache Airflow, dbt, and cloud-based data platforms. Eager to build reliable, scalable data infrastructure

WORK EXPERIENCE

Permodalan Nasional Madani (Intern) – Jakarta, Indonesia

Back-end Developer (Jul 2025 – Dec 2025)

- Built and optimized production backend services using Golang to support internal applications at scale.
- Designed and maintained RESTful APIs enabling reliable structured data communication across distributed systems.
- Managed data workflows and improved system reliability through structured backend architecture and rigorous debugging.
- Collaborated with senior engineers in Agile sprints to deliver features on time and within scope.

PROJECT EXPERIENCE

Inventory Loan System for Organization– Jakarta, Indonesia

Backend Developer (Dec 2025 - Mar 2026)

- Designed and implemented backend logic and database schema in Golang to handle equipment loan and tracking processes.
- Automated previously manual data workflows, significantly improving operational efficiency.
- Led backend development independently from architecture design to production deployment.

Financial Profitability Prediction System (Final Project) – Jakarta, Indonesia

Data Analyst & Backend Developer (Oct 2025 - Dec 2025)

- Architected and implemented a full end-to-end data pipeline covering raw data ingestion, preprocessing, feature engineering, model training, and production deployment using XGBoost on real financial market data.
- Delivered an interactive React dashboard to surface model predictions for stakeholders; published findings as first author in an IEEE International Proceeding (2025).

SEMWAS (Installment Monitoring System) – Jakarta, Indonesia

Junior Backend Developer (Sep 2025 - Dec 2025)

- Contributed to backend development for a monitoring system tracking installment follow-up across branches.
- Assisted in developing and maintaining backend services and database operations.
- Collaborated with the development team to ensure system reliability

Tel-U Coin – Jakarta, Indonesia

Full Stack Developer (Sep 2025 - Nov 2025)

- Designed backend services in Golang to handle transaction data flows and wallet state management.
- Deployed smart contracts on Ethereum and integrated backend with mobile frontend via React Native.

Housing Price Data Analysis (Independent Project)– Jakarta, Indonesia

Data Analyst (May 2024 - Jun 2024)

- Analyzed housing price datasets using Python, SQL, and Excel to identify regional pricing trends and growth patterns.
- Performed data cleaning, transformation, and exploratory data analysis (EDA).
- Generated insights on market stability and key price-influencing factors to support investment decisions.

ORGANIZATION EXPERIENCE

Google Developer Student Club Telkom University Jakarta – Jakarta, Indonesia

Staff Creative (Jan 2023 – Feb 2024)

- Designed promotional posters and banners for a webinar event organized by Google Developer Student Clubs (GDSC) at Telkom University Jakarta (2023).
- Created visual content using Adobe Photoshop and Adobe Illustrator to support event branding and promotion.

Arshaka Bimantara (MAPALA) – Jakarta, Indonesia

Staff (Jan 2023 – Jan 2024)

- Led the Documentation and Publication Division (PDD) at Arshaka Bimantara (Mapala), Telkom University Jakarta, overseeing photo and video documentation for organizational activities.
- Produced and edited visual content including photos, videos, banners, and background designs to support events and promotional needs.

EDUCATION

TELKOM UNIVERSITY CAMPUS JAKARTA (2022 - 2026)

Bachelor's Degree in Information Technology, Summa Cum Laude

HARD SKILLS

Programming Languages

Python, SQL, Golang, JavaScript

Data Engineering

Data Pipeline Design, ETL, EDA, Data Cleaning, Feature Engineering

Analytics & ML

Pandas, XGBoost, Exploratory Data Analysis

Database

MySQL, Schema Design, Query Optimization

Backend

RESTful API Design, Golang, Client-Server Architecture

Visualization

Power BI, Microsoft Excel (Pivot Table, VLOOKUP)

Tools

Architecture Git, Postman, Google Colab, VS Code, Node.js

SOFT SKILLS

- Analytical Thinking
- Problem Solving
- Effective Communication
- Team Collaboration
- Leadership
- Attention to Detail
- Adaptability & Flexibility
